

A copyright owner 2200 registers his or her digital files for publication.

The consumer 2300 connect to database 2120 to search for desired files.

The consumer 2300 downloads the digital files from the file provider 2400 through a peer-to-peer connection

An appropriate amount of network points is deducted from the consumer 2300 .
The system then allots the points to the file provider 2400 ,
the platform service provider 2100 ,and the copyright owner in proportion.
